Dear Mr. Wieber:

On August 23, 2012 you submitted a public records request regarding the use of aerial drones by The University of Akron. Your request provided a series of questions regarding the use of drones by the University. There are no responsive documents from the University of Akron Police Department. UAPD does not currently and have not used aerial drones. However, the University has contracted with an outside vendor, Bob Egle/Be Productions, to create television commercials that have used a "flying cam" to take pictures of campus for the commercials. The University has done this three times since 2004. If you would like the purchasing documents related to the hiring of Bob Egle/Be Productions please advise. Otherwise, I trust this satisfies your request.

Sincerely,

Kendra L. Wilson
Legal Assistant
